4. Enter the make, model, msrp amount and discount percent of an auto you are interested in. Compute the amount off msrp you will receive as well as the discounted price. The amount off is computed to be the msrp times the discount percent (you can enter as a decimal so no need to divide by 100). The discounted price is the msrp minus the amount off. Display the make, model, mrsp, discount percent, amount off and discounted price.

Input	Processing	Output
Make as string Model as string Msrp as float Discount percent(as decimal) as float	Amount_off = msrp*(discount percent) Discounted_price = msrp - amount_off	Make Model Mrsp Discount percent Amount off Discounted price
